## **Key Learning in Mathematics – Year 1**

## Number – number and place value Number - addition and subtraction Number - multiplication and division • Count to and across 100, forwards and backwards, beginning with 0 or 1, • Read, write and interpret mathematical statements involving addition (+), • Recall and use doubles of all numbers to 10 and corresponding halves subtraction (-) and equals (=) signs • Solve one-step problems involving multiplication and division, by or from any given number • Count in multiples of twos, fives and tens Represent and use number bonds and related subtraction facts within 20 calculating the answer using concrete objects, pictorial representations · Read and write numbers to 100 in numerals Add and subtract one-digit and two-digit numbers to 20, including zero and arrays with the support of the teacher (using concrete objects and pictorial representations) • Read and write numbers from 1 to 20 in numerals and words Solve one-step problems that involve addition and subtraction, using • Begin to recognise the place value of numbers beyond 20 (tens and ones) Measurement concrete objects and pictorial representations, and missing number • Identify and represent numbers using objects and pictorial representations problems such as $7 = \square - 9$ Measure and begin to record: including the number line • Use the language of: equal to, more than, less than (fewer), most, least - lengths and heights, using non-standard and then manageable • Given a number, identify one more and one less standard units (m/cm) • Recognise and create repeating patterns with numbers, objects and - mass/weight, using non-standard and then manageable standard shapes • Identify odd and even numbers linked to counting in twos from 0 - capacity and volume using non-standard and then manageable standard units (litres/ml) • Solve problems and practical problems involving all of the above - time (hours/minutes/seconds) within children's range of counting competence Compare, describe and solve practical problems for: - lengths and heights (for example, long/short, longer/shorter, tall/short, double/half) Number – fractions Geometry – properties of shapes - mass/weight (for example, heavy/light, heavier than, lighter than) Recognise and name common 2-D shapes, including rectangles (including • Understand that a fraction can describe part of a whole - capacity and volume (for example, full/empty, more than, less than, squares), circles and triangles half, half full, quarter) • Understand that a unit fraction represents one equal part of a whole Recognise and name common 3-D shapes, including cuboids (including - time (for example, quicker, slower, earlier, later) • Recognise, find and name a half as one of two equal parts of an object cubes), pyramids and spheres Recognise and use language relating to dates, including days of the week, shape or quantity (including measure) Recognise, find and name a quarter as one of four equal parts of an object, weeks, months and years Sequence events in chronological order using language (for example, shape or quantity (including measure) Geometry – position and direction before and after, next, first, today, yesterday, tomorrow, morning, • Describe movement, including whole, half, quarter and three-quarter turns afternoon and evening Tell the time to the hour and half past the hour and draw the hands on a • Recognise and create repeating patterns with objects and shapes clock face to show these times Describe position and direction · Recognise and know the value of different denominations of coins and notes **Statistics** • Sort objects, numbers and shapes to a given criterion and their own • Present and interpret data in block diagrams using practical equipment • Ask and answer simple questions by counting the number of objects in each category Ask and answer questions by comparing categorical data
